If you have already signed in, the WWA recommends that riders be on site at least one hour before the scheduled start of their division.

All riders must be on site and ready to compete 30 minutes before posted start time for their division. Any division can start up to 90 minutes prior to posted start time.

Identical Riding Conditions – Since wakesports are outdoor sports, and are designed to appeal to an audience as well as provide a competition, time-consuming measures to assure identical and/or ideal riding conditions will be at the sole discretion of the WWA Chief Judge only. Re-ride requests will not be allowed if they are based on variations in conditions.

Severe Weather/ Rough Water Conditions- Decisions regarding “Severe Weather” shall be the responsibility of the WWA Staff and only the affected Athletes. The “Severe Weather” provision applies not only to rough water per se, but to any weather and water conditions that make riding significantly more difficult or may seriously affect performances.

The WWA Staff shall determine any modification to the riding specifications that may be needed in the interest of safety and providing a fair and attractive event. Such modifications may include but not limited to changes in boat speed, boat pattern, course length, and format. Once a round of an event has been so designated and riding has started, the “Severe Weather” designation shall apply to all Athletes in that round, even though conditions may improve.

No event, exhibition, or media demonstration shall be started or continued when electrical storms are in the immediate vicinity.

Event Schedule

WWA reserves the right to modify the schedule of events to make Pro Men and/or Pro Women finals the top priority. All changes will be made to serve the best interest of the event.

The WWA will put forth its best effort to complete each and every competition event and declare winners. At the sole discretion of the WWA and only as a last resort, rounds may be postponed or combined as necessary to complete events and establish winners.

The entry fee will be returned to the affected Athletes if no rounds of an event are held.

When an event has been terminated and providing at least one full round of that event was held, placements and Ranking List Points will be calculated. This shall not apply if an event was altered in such a manner as to create an unfair situation. Final decision is solely the discretion of WWA.

Reduced Prize Money Provision– The WWA reserves the right to reduce the cash awards in the case of a terminated or incomplete event. WWA reserves the right to cancel the event entirely and pay no prize money or reschedule the event at another time.

Boat speed– Riders must inform the driver the speed he/she desires. It is the rider’s responsibility to make this clear. The same rule applies when referring to what height and length the rope should be attached when applicable.

Rider Preparedness– The rider must be in his/her bindings, with a rope that will not interfere with the rider being ready to ride when the boat returns to the dock. Any rider who fails to be on immediate hand & in condition to ride when it is his/her turn in the running order, the rider can be disqualified.

Safety Equipment– All contestants shall wear a U.S. Coast Guard – Approved life jacket or a life jacket that will absolutely float a contestant who is unconscious. A “Wet Suit” life jacket shall have a locking device in addition to the zipper closure. A “Pull Over” or “Side Entry” life jacket shall have a locking device, zipper, or a drawstring. All contestants hitting any features in the water must wear a helmet (protective head gear) is defined as an article of apparel whose manufacture and use is solely for the purpose of protecting the head from injury.

Equipment Failure– For any equipment failure, the rider has five (5) minutes to repair the equipment. The judge will call the Chief Judge for the clock to begin and he will count down to the judge the time. The Chief Judge will have the final say on if equipment has failed. Equipment can be repaired at the dock if needed. Time starts when rider steps on the dock for a dock repair. If the rider chooses to return to the dock he/she cannot repair the equipment until the rider is placed on the dock. If the rider starts repairing the equipment elsewhere his/her time starts at that moment. The rider must be on the dock & repair completed before the time elapses or his/her ride is over. The athlete will resume the run at the same location they were picked up in the water. An equipment failure is counted as a fall.

When the rider realizes they have an equipment failure they can raise their hand. After the repair they will resume their run where they raised their hand. If an athlete falls and then discovers an equipment failure, they will resume the run at the location of the fall after the equipment failure has been remedied. If the rider falls and then gets back up and realizes their equipment is broken they have the chance to throw the handle without being charged with a fall. If the rider tries a maneuver and then realizes their board is broken they will be charged with a fall.

A rider can also wave off his run if he throws the handle before he/she enters the course before the first pass only if there is a problem such as the rope being on the wrong ring to fix it with no penalty. A wave off is not counted as a fall.

Reviewing Scores | All Divisions

1. There will be no protesting of scores. A rider may request to look over the Full Heat Results page to see the official scoring and placement of each judge.
2. If the rider has a question about the scores they may ask the Chief Judge.
3. The Chief Judge will then review the rider run sheet and score sheets to ensure there are no discrepancies between the judges. If the Chief Judge is satisfied with his/her review, he/she will let the rider know his decision. If the chief judge finds a discrepancy on the judges score sheet he/she will meet with the judge immediately. The judge will make sure that the discrepancy is addressed on his sheet and he/she will re-evaluate his scores to make sure his/her scores and placements are correct. If the judge makes a change the chief judge will have the scorekeeper record the change and post new results. There may or may not be a change in placements after a judge changes his/her score.
4. If the chief judge evaluates the judge’s sheets and is unsure of a judge’s decision he/she will meet with the judge immediately and ask them to double check their decision. If they are certain on their decision, the issue is over. The results are final. If the judge makes a change the chief judge will have the scorekeeper record the change and post new results. There may or may not be a change in placements after a judge changes his/her score.

5. The Chief Judge will make his/her best efforts to deliver a final decision in a timely manner. The Chief Judge has the final say in all decisions. No rider is allowed to approach the individual judges. Any rider found harassing judges or using profanity during the protest will be subject to the code of conduct and applicable fines.
6. If a rider would like to educate themselves for the future they may do so after the event is over. If the rider is present at the end of the competition the chief judge will make his/her best efforts to let the rider speak with the judges.
7. If a rider has an issue while on the water competing- The rider needs to communicate this to the judges ASAP. The judges will radio the Chief Judge to discuss the issue. The Chief Judge will take the proper steps to solve the issue. The rider must state the issue either prior to resuming his/her pass, or, prior to the next athlete beginning their pass.
8. All judges will make their best efforts to be at the Chief Judge's station immediately following the last event each day to answer questions. There may be situations when the judges are forced to leave the site before or right at the end of the event. Therefore, the chief judge and remaining judges will be responsible for making the final decision.

Judging

All riders will be judged using the DRIVE system. Judges will be using an Overall Impression system to evaluate/ analyze the rider's runs. Judges will be looking for the most versatile rider by breaking it down into difficulty, risk, intensity, variety and execution.

Three or more judges should be used to judge an event.

Wakesports are subjectively judged sports. There are no predetermined points for any tricks and each contestant is free to perform whichever tricks in whatever order he or she desires. There is no maximum or minimum number of hits or tricks required, although riders are encouraged to make the most of the time and course allotted. Riders are not judged on the number of tricks performed, but rather the quality. Each trick is scored on its own merits, regardless of technical difficulty and only as part of an entire run.

Scoring

There will be no predetermined values for placing. Each judge will analyze the rider's runs based off of the DRIVE criteria and score them appropriately. Judges will be able to reward as well as penalize riders according to the performance of their runs.

- D difficulty
- R risk in the run
- I intensity
- V variety
- E execution

Difficulty

Trick difficulty (Technical Difficulty)– This is simply defined as how difficult each trick is based on a number of variables. Spins, slides, rolls or flips including spins, grabbing your board, handle passes and the way a rider lands all subjectively define how difficult certain tricks are in comparison to others.

Number of rotations

Combos (combining tricks, adding spins, grabs etc)

The direction a rider spins in relation to the trick. Frontside or backside (blind)

Switch vs. regular stance

Handle pass vs. landing wrapped

Grabbed or not

Risk:

Linking difficult tricks

Trick difficulty in relation to the course.

Risk – A rider opening their run with a technically difficult trick would be considered high risk. Risk is also demonstrated by how a rider performs their tricks and whether or not they display a sense of “putting it all on the line” in order to better their opponents.

Intensity

Here judges look for how big or high the rider is taking each of their tricks. This is typically noted on the judges sheet by a plus sign, “+”. If the trick was incredibly high, and the judge will place 2 plus signs next to it on the judges sheet, “+ +”. The same goes for tricks done small may have a minus “-” sign.

- Wake to wake vs. out in the flats
- 270 transfer vs. boardslide

Variety

A variety of tricks performed in a pass is what judges are looking for in order to determine the most versatile rider.

Wakesports have categories of tricks such as: straight airs/glides, spins, inverts/flips and rails/obstacles. A good pass should have tricks from each of these categories and be well rounded. This shows a rider is skilled at all types of manoeuvres and therefore showing variety in their riding.

Were the tricks all based on the same trick? (roll, roll 2 rev, roll 2 blind, kgb = similar)

Were the grabs different?

Did the rider spin both directions?

Were the rails slid differently? (boardslide v lipslide, heelside v toeside)

Execution

Completion of the Trick – This is essentially how the trick was performed in the air or on the rail and that the rider is in control. Control and poise during the middle of a trick shows the rider is confident in that trick and thus it is well executed. Control and completion of a trick also means that the rider is performing a trick he/she set out to complete. Example: If a rider attempts to do a 360 and bobbles halfway through the trick and only performs a 180, it shows they are not in control.

The Landing – This is simply how clean the landing was of the trick. If the rider butt checks, falls off the rail, bonks the rail, drags a hand, switches 180 to avoid falling, or looks out of control after they have landed this can negatively affect the execution category.

Perfection – Judges are looking for how “clean” or how perfect EACH trick was performed in the passes. Judges look at the approach, the body position, rotation of the trick, the axis of the body, head position, handle position, clean grabs not slaps, speed to which the trick was performed. A rider completing their routine without falling also demonstrates perfection.

FLOW: Flow is when a rider can execute their tricks together to make them look like they connect smoothly from one to another. For instance, when a rider lands a trick switch and then cuts into the wake to do the next trick in the same switch position. A rider that does not flow well would do things like constantly hopping from switch to regular or vice versa in their transition between tricks, starting the pass late, or finishing a pass early. Dead water is not showing flow or composition.

Did the rider customize or adapt tricks...make them their own?

General

Creativity of course management and time is crucial in achieving a smooth, fluid, flowing run. Riders that take the time to plan out their run, plan the path they are going to take in and around the obstacles/rails will be rewarded in this area. Riders that can link creative tricks/maneuvers between obstacles will also be rewarded. Judges will be looking for riders that use up the full time, and length of the course. Wasted water will reflect negatively towards the rider’s score.

Judges will only score tricks successfully landed. Falls will be evaluated into the score based on how you did against the other riders in your heat. Where a fall happens in a riders run and how many you have can definitely affect the overall look and flow of a riders run which will be considered in a riders score versus the other riders in the heat.

Ties

Ties will be broken by placements. The first tie breaker will go to the rider with most first places. Second tie breaker will go to the rider with most second places and so on until the tie is broken.

Regular Competition Format– Wakesports shall be contested in one, two, three or four rounds including qualifying/quarterfinals, semifinals and finals. Rounds can be altered due to weather, number of entries, television or any other applicable situation as designated by the Nationals. The WWA will determine the number or rounds.

Semifinal and Final round seeding are determined by position finish in previous round. If both had the same identical final position in previous round, you would go back to round before that, and round before that before going to the seeding on the original running order used for the quarterfinals. (For example, if rider A and rider B both finish first in their heats in the semifinals, and you had to determined who was the top seed in the finals, you would go the quarterfinals finish, if both A and B finished first their also or if there was no quarterfinal round, you would go back to the seeding on the original running order used for the quarterfinals.)

Running order–Number of rounds will be determined by number of entries. All riders must compete in the order of the posted running order. If an athlete rides out of order his/her scores with not be counted.

Event Formats

Wake Park Standard Format

Overview

Contestants may perform any number of tricks they choose in any order they wish. Riders will be judged on the difficulty and proficiency of the moves executed, how big they are going, variety of moves performed, technical difficulty, use of obstacles and creativity and fluidity.

Judges will be placed in "zones" around the cable course and will judge each rider only on tricks performed within that zone and rank each rider against the others in the heat. Zones may be assigned as apparatus, corners, straights or any other method at the discretion of the head judge.

Wakesports is a subjectively judged sports. There are no predetermined points for any tricks and each contestant is free to hit whichever obstacles and perform whichever tricks in whatever order he or she desires. It is up to the event organizer to determine if there is a maximum or minimum number of tricks or hits required, although riders are encouraged to make the most of the time and course allotted. Riders are not judged on the number of tricks performed, but rather the quality.

Riders should emphasize quality over quantity while demonstrating the range and limits of their abilities. For example, it is better to perform 10 big moves than 14 small moves. Every move the rider performs will be evaluated in the scoring of the run.
